SUMMARY

Full-stack web developer proficient in React, Node.js, Express, and MongoDB, with hands-on experience building production-style projects including a peer-to-peer marketplace application and an AI-powered customer support chatbot. Strong foundation in Data Structures and Algorithms, RESTful API design, and responsive front-end development. Seeking a Web Developer role to contribute to a dynamic engineering team.

TECHNICAL SKILLS

Languages: JavaScript, Java
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, RESTful APIs
Database: MongoDB, MySQL
Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, AWS (basics), CI/CD (GitHub Actions)
Other: Data Structures & Algorithms, Responsive Web Design, Figma

EDUCATION

Bachelor of Technology in Computer Science Engineering *2023 – 2027*
Madhav Institute of Technology and Science / RGPV | CGPA: 6.4/10

Higher Secondary (XII), Science *2022 – 2023*
BRM Global Convent School, Morena | Percentage: 80%

PROJECTS

E-Commerce Web Application — "SecondHand" *Jan 2026 – Mar 2026*
Tech Stack: React, Node.js, Express, MongoDB

- Built a full-stack peer-to-peer marketplace enabling users to list, browse, and sell secondhand items, with secure authentication and cart functionality
- Designed and implemented RESTful APIs for listings, categories, and user transactions, optimizing MongoDB queries to reduce average response time by 30%
- Deployed the application on Vercel/Render with continuous integration and deployment (CI/CD) using GitHub Actions

AI Customer Support Chatbot *Sep 2025 – Nov 2025*
Tech Stack: Open-source LLM, Python, React

- Developed a locally-hosted AI chatbot using an open-source LLM to automate customer support and FAQ resolution
- Designed and tested prompt templates and response-handling logic to improve answer accuracy and reduce hallucinated responses
- Built a lightweight React-based chat interface for real-time interaction and testing of model responses

INTERNSHIP EXPERIENCE

AI Research Intern — Ethara AI *Dec 2025 – Jan 2026*

- Reviewed and rated LLM-generated responses as part of post-training (RLHF-style) evaluation pipelines to improve model accuracy and alignment
- Collaborated with the research team to identify response quality issues, edge cases, and inconsistencies in model outputs
- Contributed structured feedback that helped refine model behavior across accuracy, helpfulness, and safety dimensions

CERTIFICATIONS

- HTML and CSS — Infosys Springboard (Jan 2026)
- Generative AI — Oracle (2025)

ACHIEVEMENTS

- Solved 100+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks
- Independently designed, built, and deployed two full-stack production-style projects (SecondHand marketplace and AI chatbot)
